

4.15 Kamban Software (India) Private Limited

Introduction

Currently they are developing the software modular using Microsoft's Template Library. They have successfully outsourced their "Help files", fonts, dictionary entries on their current release version of the software. Please contact Vasudevan from Australia for development, programming and outsourcing contracts.

Kamban Software production is done in Singapore since Version 2.0. All distributions and wholesales are done from Singapore.

Chennai Branch in India is opened recently to cater for Indian sales. Currently their programs are now taught in Annamalai University and is widely used in southern parts of India.

4. Tamil Editor:

This is a simple editor / E-Mail program based on Tamil Nadu Government's Standard Bilingual Font Encoding. This can be downloaded from the web free.

The idea of this program is to propagate Government's Standard to everyone, and help jump start with the basic program. Apart from being a simple program it also offers a simple E-Mail function. With the help of this editor now you can communicate around the world with the Government standard. Very soon as more and more Web pages and E-Mail around the world are converted to the new standard, this program and the associated fonts will become indispensable.

This program will fit in one disk. You can download this program save it to a temp directory and then run the program from the temp directory. This will automatically install the program TEdit and two fonts TABMaduram and TAMMaduram. Both the fonts are based on Government standards for Bilingual font and Monolingual font respectively. If you want to distribute the program, copy this program to the disk and distribute it. No licenses is required, however it must be distributed free of charge and should not be used for any monetary benefits.

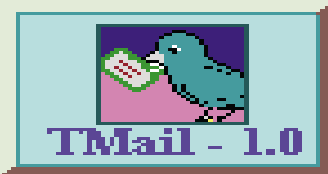

Features:

- English and Tamil typing.
- Choice of English and Tamil Menus. Tamil Menus are based on Mono Lingual font!
- Government proposed standard for Keyboard typing which helps editing/typing simpler.
- Two fonts, TAMMaduram - Mono lingual fonts

used in Menus and TABMaduram - Bilingual font used in Editor.

- Special Tamil Character symbols!
- Tamil Numerals and provision for old 'Li', 'Ni' character
- Kamban Addition of <Escape> Key behaviour which replaces UyirMei character with Mei character!
- Built in Keyboard for on-line point & click typing. This helps in familiarising the keyboard layout.
- Floating / Dockable Toolbar and Keyboard layout.
- Online Help file
- Print and Print Preview.
- Provision to send e-mail from application

5. Tamil Mail

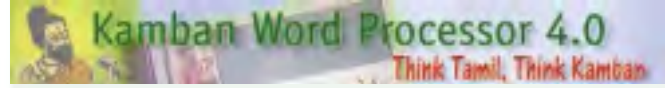

A simple Tamil Mail program based on TSCII encoding. This was our first program provided free on the web, to support TSCII encoding and Tamil based menus. It is still popular among dedicated TSCII fans.

Features :

- English and Tamil typing.
- Choice of English and Tamil Menus
- More Enhanced SEF which helps editing/typing more simpler
- Two fonts, Maduram and MaduramTSC
- Govt. Standard Keyboard which can be learnt quickly, as shift keys are used very rarely! (Only Sanscrit characters use shift)
- Built in Keyboard for on-line point & click typing. This helps in familiarising the keyboard layout.
- Floating / Dockable Toolbar and Keyboard layout.
- Unlimited File Size (upto 1 GB storage for editing)
- Provision to send e-mail from application
