

4.20 Net Vision Web Technologies Ltd.

Introduction

“Achieving complete customer satisfaction by fulfilling all the needs through technical excellence, versatile managerial talent, innovative software solutions so as to become a leading highly valued global IT technical solution provider”.

NetVision is one of the India's fastest growing IT group with strong focus on Software Development, Multimedia Developments, IT Consultancy, Feasibility Study, System Analysis & Design, Project Management & Training. NetVision commenced its operations in January 2000, has achieved unbelievable growth rate of 1000% in less than 12 months.

In January 1999, NetVision commenced its operations with a strong focus to become global IT corporate. NetVision commissioned its first Development Unit in Ahmedabad with 30000 sq. ft of workspace.

In the Internet era, the problem lies with keeping oneself updated with latest technologies. Microsoft stays two years ahead of time. Sun Microsystems comes up with something called JAVA, which brought a revolution in the way software solutions were developed. These developments and changes opened new career paths and opportunities for growth. As Gujarat is well known for its intellectual capital and businessmen, there arose a demand to be a part of this Internet revolution.

There were very few visionaries at the time, which felt Internet is the next big area of development. NetVision was among the first Software Company to come up with major plans in high-end Software Development & Computer Training.

NetVision is dedicated to offer the best quality in computing solutions, multimedia development & training methodologies. NetVision HOUSE with 35000 sq. ft space and project management capacity of over 1200 software professionals proved to be the right place for providing total solution information technology services to government enterprises, semi government sectors, educational institutions, banking & financial institutions & various industries.

NetVision management and research teams are putting untiring efforts in the 24-hour

developmental labs; software professionals constantly deliver the products pertaining to the industry need in coverage of all the new developmental aspects getting introduced in the IT market.

NetVision has evolved as a fine source for sun-certified Java professionals in India, giving more than 75% of Sun Certified JAVA programmers (SCJP) to the Indian IT stream which is a record in itself.

This was the beginning of series of new openings of NetVision branches all over the state of GUJARAT & MAHARASHTRA. NetVision is now a major player in IT world of INDIA with over 100 locations in various states like GUJARAT, MAHARASHTRA, RAJASTHAN, PUNJAB, HARYANA, CHANDIGARH, UP, All the Seven NORTH EASTERN STATES & likely to come in the states of WEST BENGAL and countries of UAE & BANGLADESH.

AksharNet

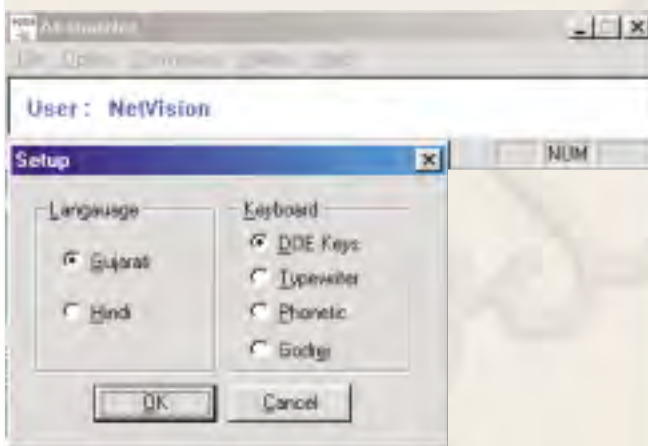

AksharNet is Indian Language software. It is scientifically designed to match Phonetic characteristics to the maximum possible extents. You have to type the spelling according to the Pronunciation of Hindi/Gujarati Word. AksharNet Also contains Sample Example for Mail Merge, Font Conversion, Number to Words etc.

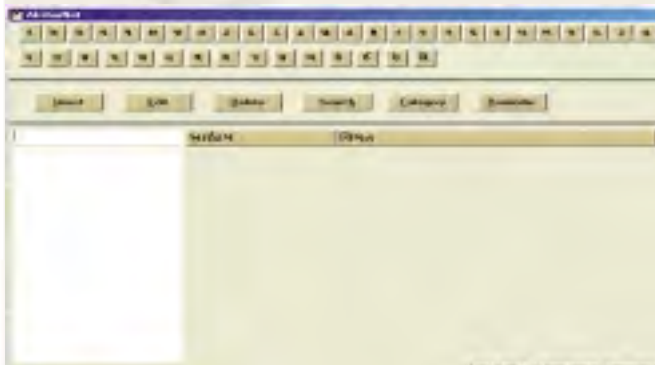

It can basically be divided into two parts on the bases of its use :

1. Desk Top Application
2. Data Processing Application

Desk Top Application:- AksharNet can be used for all application on windows. It Supports office automation software like MS Word, MS Excel, MS Power Point, Outlook and Netscape.

Data Processing Application:- AksharNet consists of fonts, keyboarding software and an application development tool-kit (SDK). Using AksharNet you can develop an application around a Unicode compliant RDBMS such as Oracle, MS SQL Sever,

MS Access.

Target Users

Government

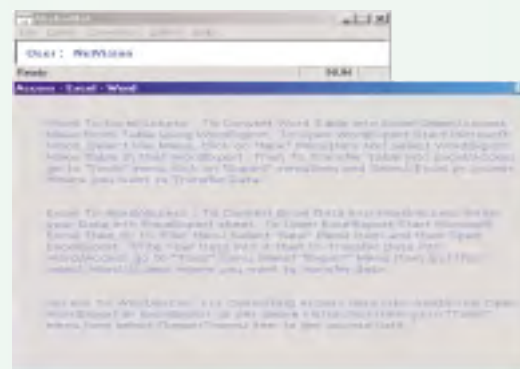

Central and State governments for e-governance applications, Government departments, PSUs, Educational and Research Institutions etc. In Gujarat Government all office correspondence is done with Gujarati regional language.

AksharNet Software is designed to FullFill all correspondence of Government Departments.

Main Features of AksharNet

Unique Technology

AksharNet offers a unique capability that is unparalleled and solves a long-standing problem of true data processing capability in Gujarati/Hindi languages. AksharNet can be used with a Unicode compliant RDBMS software for data entry, indexing, searching, sorting and generating reports. The data is universally portable and can be displayed using any Unicode compliant fonts and application software. With AksharNet this data can be displayed in non-Unicode environment like win95/98 without Unicode fonts also. AksharNet also supplies ISCII char set as an alternative to Unicode. AksharNet is based on the latest technologies such as Unicode. It ensures that the applications developed using AksharNet technology can be deployed on any hardware/OS platform and the data produced by such applications will be universally exchangeable and portable

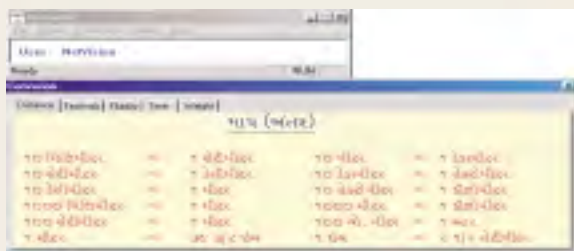

TransPro Transliteration Utility

This utility is currently available for Gujarati/Hindi. It Phonetically transliterates English text or database to Gujarati/Hindi and vice-versa.

This facility makes it easier to deploy and use Gujarati/Hindi Languages with existing English applications.

Universal Filter Technologies

AksharNet lets you read the text entered in Gujarati/Hindi Indian language software. It also supports a ISCII to Unicode, Unicode to ISCII, Gujarati to Hindi, Hindi to Gujarati, Gujarati to English

standard Conversion.
