Salient Features

International Standard Installation Procedure

Installation of this package is based on international standard. It can be installed through run command. Software also provides uninstallation facility. User can install in Standalone Machine, Server or Client Machine using the same installation.

Movable & Sizable Desktop Bar

Always on top desktop bar which can be placed anywhere on the screen and can be resized as per the need. Any APS utility can be invoked from this bar.

Language Toggle Switch

On line toggle switch is provided to change the script. This is a very convenient method resulting in maintaining the speed of the operator.

Multiple Languages

Software comes with Nine (9) Indian languages such as Marathi, Hindi, Gujarati, Telugu, Tamil, Kannada, Malayalam, Bengali, and Punjabi languages.

Multiple Keyboard Layouts

13 keyboard layouts commonly used or required by the user like Typewriter, Godrej, Remington, Akshar, Prakashak, Shabdaratna, INSCRIPT, Executive, English Phonetic, DOE etc. are available.

Keyboard Designer

Keyboard Designer helps a user to create a customized keyboard of his/her choice.

Anglonagari Keyboard Layout (English Phonetic)

A special keyboard layout based on Roman typing

Keyboard Layout Viewer

An on-line Keyboard Layout viewer is provided for viewing the layout of the selected Keyboard. User can print the selected layout.

Format Conversion Wizard

Text import filter for files prepared in DOS based text editors like Akshar, Shabdaratna, Modular, Script, Devyani, Prakashak, and LE etc.

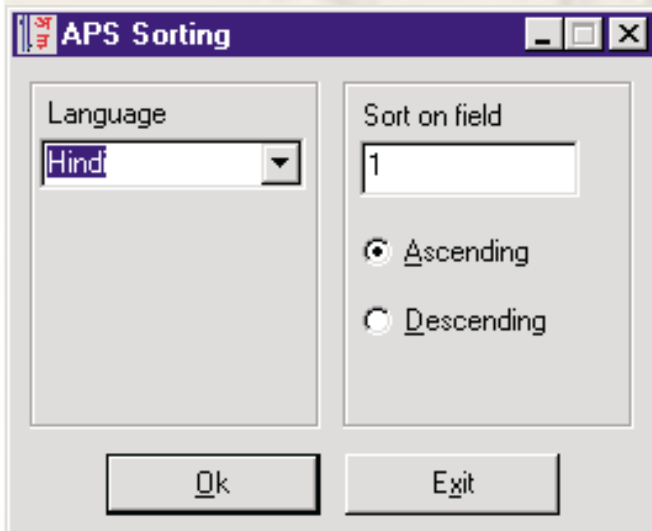

ISCII Compatibility

Using this package you can import/export APS Corporate 2000++ text files to ISCII format.

Hindi Sorting

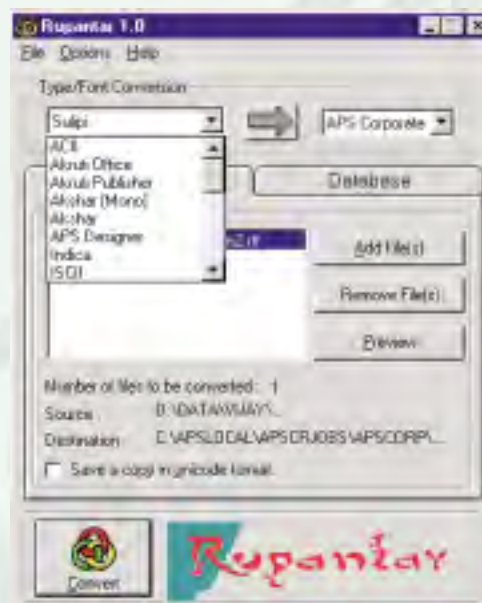

This package allows sorting of bilingual data (from spreadsheets, tables etc.) mainly viz. names, addresses, cities, etc.

Rupantar 1.0

This a very unique utility to convert text (.txt, .rtf) as well as Database (.mdb, .xls, .dbf)

prepared in other vendors font format to APS Monolingual or Bilingual font format and vice versa. Multiple files of a single vendor/ font format can be converted in single conversion operation. Rupantar supports 24 popular vendors/font formats like Akshar, Akruiti, Winkey, ShreeLipi, Sulipi, ACII (Leap Office) etc.

Chitragupt Word Processor

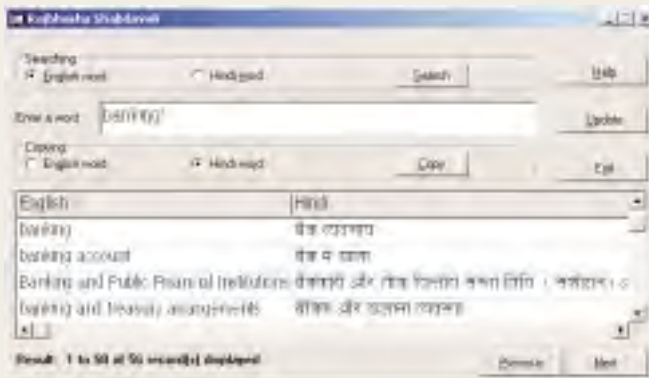

Bilingual Word Processor with facility for converting English text to Hindi word by word basis or vice versa. The Word Processor can transliterate text written in any one Indian Language to other Indian Language. (e.g. Hindi to Gujarati or Punjabi to Tamil etc.)

Unicode Support

Files prepared in Chitragupt having APS Text can be exported in UNICODE format. Using Rupantar 1.0 text prepared in other vendors font format as well as in APS font format can be converted in UNICODE format.

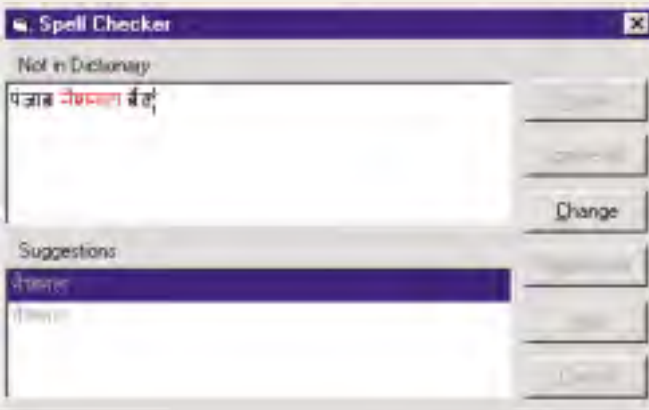

Official Language Dictionary

This utility provides searching of English Word for appropriate Hindi Word and vice a versa using RajBhasha Dictionary.

Spell Check

Spell check is a utility for checking Hindi spelling. It works on the same line as that of English spell check.

Bilingual Email in MS Word

Using APS-Tools User can send email directly from MS Word in Indian languages.

Hindi Mail Merge in MS Word

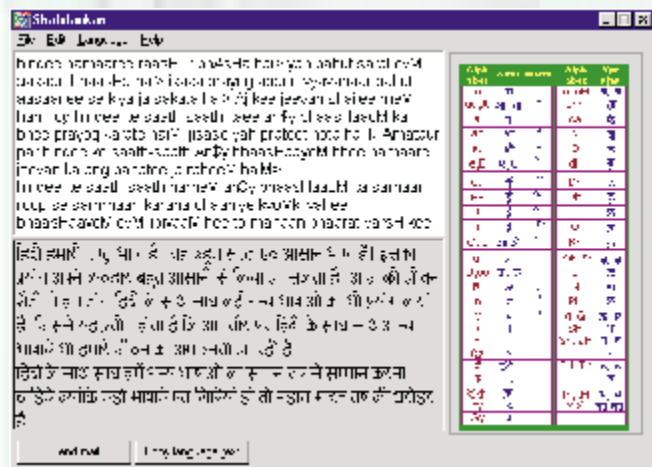

Using this utility user can merge the MS Excel Devanagari database in MS Word document.

HTML Support

Allows to save the text in HTML format.

Shabdankan

A unique feature to enter text in Devnagari or other Indian Language with a facility for an English typist to type in English as he spells it. This will generate appropriate Devnagari or other Indian Language text, which can be copied and then pasted to desired destination window.

Aesthetic Bilingual Fonts

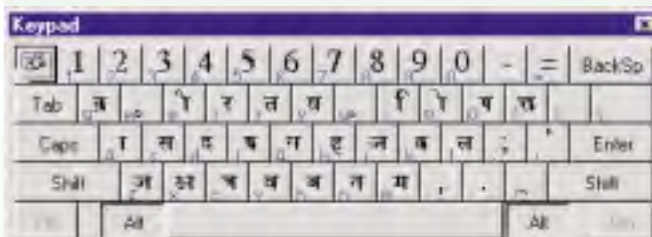

Most readable text, Bold and aesthetic Devanagari-English fonts for on-line usage.

Lan Environment

You can use this package under multi user environment like Windows NT and Novell NetWare at any of your locations.

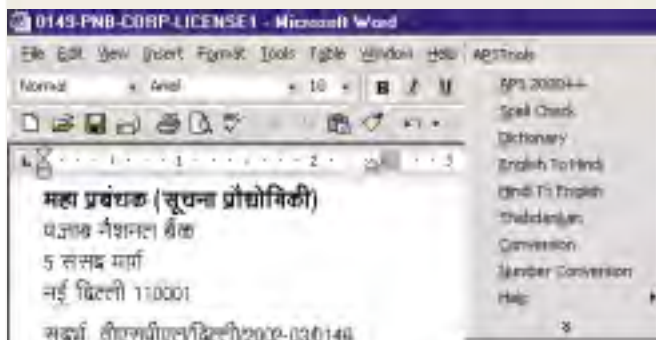

Key Pad

Key Pad is a general-purpose utility for a user, who is not conversant with typing in Hindi and not much familiar with English keyboard also. Thus using Key Pad and mouse, user can create small text. Further, please note that unlike other packages, keypad facility is available in every MS Office module.

APS Tools

APSTools are Add-ins for automating tasks, concerning Indian Languages in MS Word and MS Excel. This menu is an add-on feature and gets directly invoked in MS Word and in MS Excel while working with APS Corporate 2000++.
