

# Anglabharati Web Forum

## Introduction

An Anglabharati web forum is an online discussion site where people can hold conversations in the form of posted messages. They differ from chat rooms in that messages are at least temporarily archived. Also, depending on the access level of a user and/or the forum set-up, a posted message might need to be approved by a moderator before it becomes visible. This portal is developed using ASP.NET, C#.NET Technology. Below are some screenshots of web forum. The access link is <http://angla.cdacnoida.in/>.

## Forum Structure

A forum is hierarchical or tree-like in structure: a forum can contain a number of sub forums, each of which may have several topics. Within a forum's topic, each new discussion started is through a thread, and can be replied to by as many people as wish to. Below is the homepage snapshot of forum.

Depending on the forum set-up, users can be anonymous or have to register with the forum and then subsequently log in in order to post messages. After login portal looks like as below:

sections, as well as perform any database operations such as providing login permissions and authenticity. Administrator often also acts as moderators. Administrators may also make forum-wide announcements, or change the

Logically forum is organized into a finite set of generic groups. Information driven and updated by *members*, and governed by a moderator. The administrator manages the technical details required for running the site. As such, they may promote (and demote) members to moderators, manage the rules, create sections and sub-

appearance of a forum.

### Common Features

Anglabharati web forum application has an ability to submit threads and replies. Forum software may sometimes allow categories or

sub forums like of general, health and tourism domain. The reverse chronological order view associated with forums. When someone attaches a file to a post they are uploading the file to the forums' server. Forums usually have very strict limit on what can be attached and what cannot. Since members can upload and download various useful information with each other. Once any member upload any information on portal, instantly a trigger is fired a thread in form of E-mail intimating the upload

information to all the associated members due to which current news about information to every member is updated without visiting the portal. E-mail contains direct link of thread in order to access it after sign in without opening any web browser. E-mail containing information looks like as below?

We thank Mr. Gaur Mohan for the help and support provided by him in developing this portal.
